June 22nd –July 2nd

Under the Sea: Discover the world's oceans and the creatures that live there. We will explore everything from the smallest microscopic creatures to the blue whale, while we take a closer look at the creatures that live in our own backyard, The Long Island Sound.

July 13th –24th

Dinosaurs: Are you an Omnivore, a Carnivore, or a Herbivore? We'll go back in time to when the dinosaurs roamed the earth to meet some of those big guys and find out more about them. We will dig like paleontologists to try and discover our very own dinosaur.

Aug 10th – 20th

Animals and their Habitats: Why do turtles have shells? Why does our snake have a funny nose? Why are an Africa elephant's ears so big? While traveling through deserts, plains, the tundra, mountains, and forests in search of unique creatures, we will answer these questions and more.

Feel confident that your children will have
a safe and fun summer adventure!
